

Production Management

Redefining productivity!

Simplify Business Complexity

Manufacturing companies need agility -to balance **supply** and changing **customer demand**, meet rigorous **compliance requirements** and efficiently introduce complex or even customized **products to market**.

An inability to react swiftly to customer issues or to be able to plan and deliver goods in a timely manner, can be the difference between success and failure for today's manufacturers.

SOFTONE provides **broad and deep ERP functionality** that helps manufacturing companies schedule production and adapt to volatile demand, while optimizing inventory and resources to reduce operational costs and waste.

Focusing on the unique requirements of process manufacturing, **SOFTONE ERP** delivers production control, inventory management, supply chain management and more, so you can drive efficiency, streamline processes and improve customer service.

Stay on top of Your Production

SOFTONE ERP offers **visibility, transparency** and **alignment** in your transactions, allowing you to optimize your entire manufacturing operation -from production planning and control, sales orders and purchases to inventory, accounting and financials.

Easily integrated with your suppliers' applications, SOFTONE's production solution is a **full-function, comprehensive planning and management system** that helps your business:

- ✓ boost efficiency across all production processes
- ✓ balance materials, labor usage and expenses to reduce overall costs
- ✓ increase resources utilisation
- ✓ gain real-time insights to improve forecasting and delivery performance
- ✓ eliminate complexity and cut down production bottlenecks
- ✓ ensure the quality of products and services.

Whether a small operation, or a large enterprise with multiple sites, **SOFTONE ERP** efficiently supports the system requirements of make-to-stock, make-to-order, engineer-to-order, project-centric, batch and repetitive manufacturing companies.

Featuring an advanced **Industrial Costing** module, **SOFTONE Production Management** software controls your manufacturing process, from raw materials to finished goods, while tracking and managing all related cost data -materials, purchased items, supplies, labor and production overhead.

Accelerate and streamline your production processes with powerful tools and capabilities, inside a **flexible** and **configurable platform**:

- Production Costing
- Inventory Replenishment
- Item Variations
- Guarantees, SN's and Lots
- Stock Availability
- Pricing Policies
- Cost Accounting
- Multi Company, Multi Site, Multi Currency, Multi Lingual

Powerful Production Management Functionality

Production Management

Production: Manage production specifications and monitor joint products and by-products as well as production orders and related documents. Utilize waste management capabilities throughout distribution of physical inventory. Fully manage and optimize inventory balances, consumption requirements based on production orders or sales orders.

Internal Costing (industrial): Calculate production cost and update the inventory with the values of products produced and consumed. Respectively update Cost Accounting with production, consumption and costing transactions. Process automation through distribution of physical inventory. Automated calculation of product costing based on weight factors.

Supply Chain Management

Inventory Management: Track stock items per site, warehouse, location, batch, serial number packages. Utilize multiple inventory control systems and valuation methods such as FIFO and LIFO. Reduce costs and eliminate waste using ABC analysis.

Multi-Site Warehouse Management: Manage storage locations and materials. Easily track inventory on web and mobile interface.

Stock Locations: Manage unlimited warehouses. Fully monitor storage bins and shelves throughout all stock movements.

Alternative - Corresponding Items: Manage alternative codes for stock items and automate stock item retrieval based on alternative codes on trading documents.

Key Features

- BOMs (principal, alternative)
- Co-products
- By-products
- Waste (%)
- Configurable production screen
- Raw and package materials reorder processing
- Shipping
- Dispatching
- Invoicing
- Special taxes
- Duties
- Automated tax calculation
- CRM

Serial Numbers - Service: Monitor of serial numbers in all transactions.

Lots: Monitor lot number records with complete information on the expiration dates and stock quantities, which may be included in transactions per document line. Lot transactions are traced in a dedicated log.

Color, Size & Season: Manage and monitor stock items according to a combination of maximum three different attributes, coupled with a wide range of related reports and other statistics.

Group Sets: Manage composite items and use numerous related automations during transactions. Create group sets for stock items or services (if applicable) and monitor their cost during composition of sets with an option for automatic generation of composition or decomposition documents during transactions.

Commercial Activity

Customers, Suppliers, Debtors & Creditors:

Complete file and base information management for trading parties. These constitute central entities of the application, which are used in all transactions of the commercial mode (purchases, sales, collections, payments, expenditures/special transactions).

Sales & Order Taking: Fully manage sales, orders, quotes, shipments, returns, credits, annulling notes etc.

Purchases & Order Placing: Fully manage purchases, orders, quotes, shipments, returns, credits, annulling notes etc.

For a Wide Variety of Manufacturing Companies

Energy

Cosmetics

Fashion Industries

Printing

Pharmaceutical Companies

Plastics

Metals

Industrial Machinery & Components

Electrical Machinery & Components

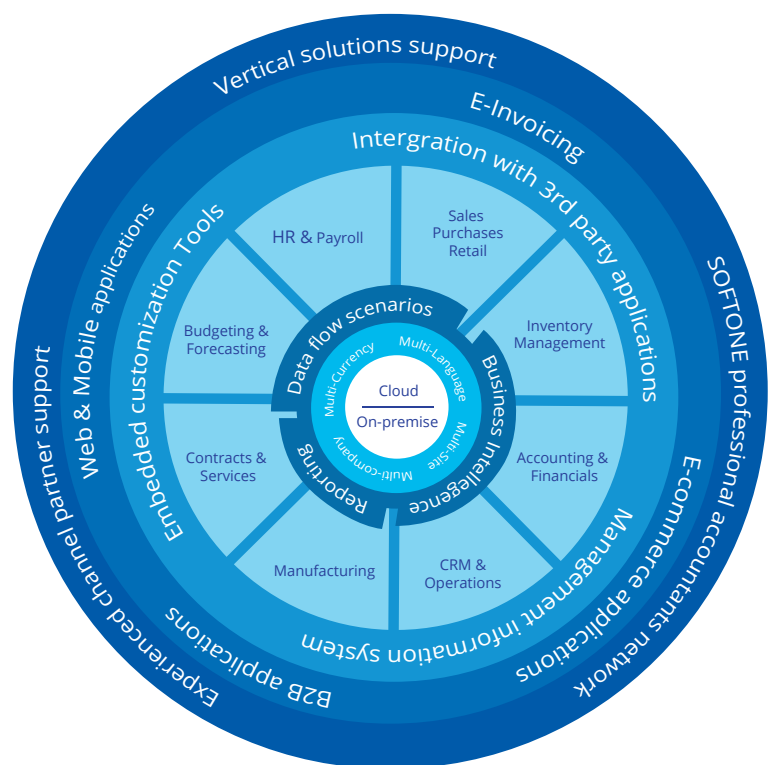

Food & Beverage

Beer, Wine & Spirits

Furniture Companies

“One-for-all” Solution

The **award winning SOFTONE ERP** is so much more than an enterprise resource planning system. It’s an "open architecture" software that consolidates all critical business processes in a single integrated solution that helps your manufacturing company reduce total cost of ownership (TCO).

Production Management

- Production
- Internal Costing (industrial)

Sales Management

- Quote and Sales Opportunities Management
- Order Management
- Demand Management

Service Management

- On Field Service
- Maintenance Management
- Contract Management
- Product Serialization
- Material Requirements Planning

Performance Management

- Financial Reporting
- Bank & Cash Accounts
- Cash Flow Management
- Budgeting
- ABC Costing

HRM

- Human Resource Management
- Human Capital Payroll
- Employee Self Service
- Take your own Device

Supply Chain Management

- Purchase Management
- Shipping & Receiving
- Warehouse Management
- Material Management

Accounting Management

- Multiple General Ledgers
- Multiple Journals & Periods

CRM

- Contact Management
- Lead Management
- Campaign Management
- Case Management

Project Management

- Project Planning
- Resource Management
- Expense Management
- Project Billing
- Dashboards

Why SOFTONE ERP is right for your business

For Your Real Business Needs

SOFTONE ERP delivers great value to manufacturing companies of all types and sizes. It incorporates in a single system, production management modules that do more with less, helping you automate, simplify and streamline all of your business processes.

Your Business in the Cloud

SOFTONE ERP fully utilizes the significant capabilities offered by a Cloud platform and the Software as a Service (SaaS) model. It assists your manufacturing company to deliver more value to its customers while reducing up-front expenses and operating costs.

Enterprise Mobility

SOFTONE ERP provides your production business with a wide range of web and mobile applications that expand your business software reach. These applications empower your production executives, stock takers and sales team work and collaborate from practically anywhere, using any device.

Greater Business Agility

SOFTONE ERP is designed with the necessary flexibility to meet your specific manufacturing business needs. Fully configurable and extensible, it is easily integrated with any other system, while providing flexible deployment methods (on-premise, hosted or SaaS model).

Our Partners, Your Advantage

SOFTONE's extensive partners network, can get you up and running in no time! Our partners offer your business a broad range of value-added services to help you plan, implement, integrate and manage Production Management solutions of the highest standards.
